

## deluxe poultry nets with 'Hot - Gate' system

Our deluxe poultry nets have been conceived with ease of use in mind. In addition to the Hot-Gate system, the 16m, 25m and 36m nets incorporate four reinforced 19mm corner posts within the net. These nets can be erected quickly and rigidly minimising sag and leakage problems. The 50m net has a built in 'Hot - Gate' but has the normal complement of posts found on the standard net.

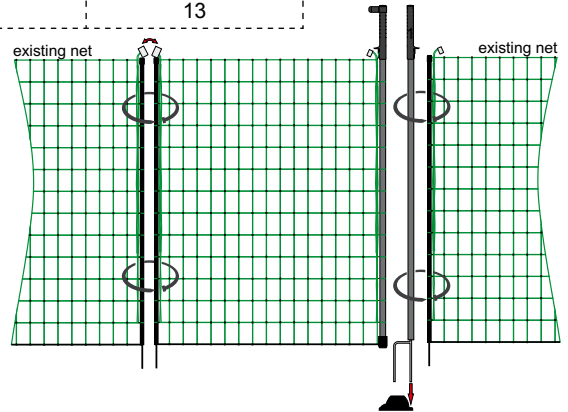

Length	Colour	Part no.	19mm posts (incl. gate)	Standard posts
16m	green	47MH16LG-PG	5	1
25m	green	47MH2LG-PG	5	5
36m	green	47MH36H-PG	5	5
50m	green	47MH5LG-PG	2	13

### stand alone Hot-Gate

The stand alone gate system can be incorporated into any poultry net. It simply ties into the end of the existing net and provides the 19mm gate posts, handles and dock.

Length	Colour	Part no.
1.2m	green	47PGS-1

## deluxe poultry net kits with 'Hot - Gate' system

Our deluxe poultry kits include deluxe poultry nets with Hot-Gate system in addition to higher powered energisers to cope with more leakage and provide capacity for expansion. The deluxe kits also include five spare posts for extra support.

### 16 & 25m Contents

- 16m or 25m deluxe poultry net with Hot-Gate (see above)
- 47HLC40 (16m) or 47HLC80 (25m) Gemini Energiser
- 47KV10 tester
- 5 47PMPBL additional standard net posts
- 47ES2 earth spike
- Ground skewers, pegs and corner guys & warning sign.

Length	Colour	Part no.
16m	green	47DPK16
25m	green	47DPK25

### 50m Contents

## rabbit net

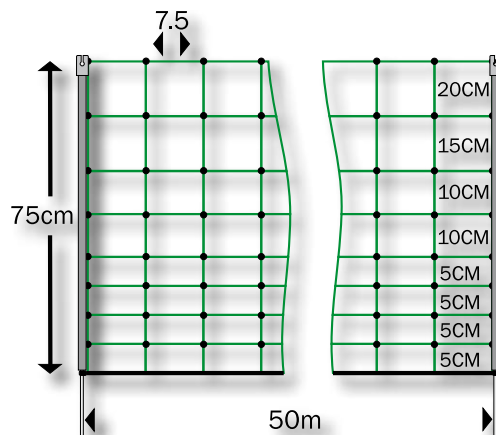

• 14 posts • 13 ground pins  
• 4 corner guys • repair kit.

Length	Colour	Part no.
50M	orange	47MR5LO

## super rabbit net

• 14 posts • 13 ground pins  
• 4 corner guys • repair kit.

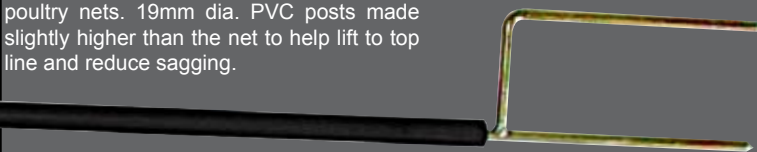

Length	Colour	Part no.
50M	green	47MSR5LG
50M	orange	47MSR5LO

spare posts and repair kits are available for all nets

### corner posts

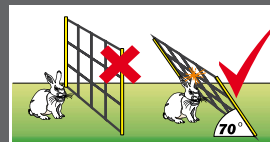

Extra rigid, double spike corner posts for poultry nets. 19mm dia. PVC posts made slightly higher than the net to help lift to top line and reduce sagging.

Qty	Part no.
each	47CP112

### rabbit netting

Where possible, try to erect the net angled in the direction of the incoming animal. This should deter the rabbit getting in close enough to chew the base line or burrow under the net.
